

# Instructions for doing the vlog / podcast about learning during the week

- Go through your personal learning log notes and see what you have written about
  - the actual topic of the project
  - other cultures or your own culture
  - yourself
    - as a learner
    - as a member of a team
    - in an international context as a user of a foreign language.
- Discuss with your group so that each of you shares 3–5 things you've learned during the week.
- Discuss whether you have learned or developed *as a group*. If so, how?

- As a group, prepare to make a 4–5-minute video or podcast choosing part of the insights you shared in your group.
  - Make sure you include different aspects. For instance, don't just include things that have to do with plastic.
  - Make sure the vlog/podcast will be good enough technically paying special attention to the quality of the audio.
    - Let us know if you need better equipment (a conference mic – camera combo or a digital audio recorder).
- Shoot the video / Record the audio.

- You can choose whether it's all of you or 2–3 of you who appear in the video/podcast.
- Send this end product to [facethechallenge.eu@gmail.com](mailto:facethechallenge.eu@gmail.com) or upload it on Onedrive / Google Drive / Dropbox and share the link to the abovementioned e-mail address.
